

# VACUUM TANKS/POOLS

## GENERAL DATA

Our pools are designed for homogeneous and required cooling the producing materials. Stainless steel used for the pools to provide long life time. There are several types of pools as vacuumed, un-vacuumed, caliber table. Vacuumed pools are excited, forward and rewind motioned and adjustable height products which have the fountain for cooling the material homogeneous. Special designed pools have special covers and the gaskets to keep the pressure without any losses. Open cooling pools may be needed after the vacuumed pools. The caliber tables have collector systems, vacuum systems and 6-axe movement ability.

## SPECIFICATION

Model	Pipe Diameter (mm) min/max	Pool Length (mm)	Water Pump Capacity (m <sup>3</sup> /hr)	Fountain Water Pump (kW)	Vacuum Pump (kW)	Fountain (pieces)
HVH 75	16-50	4000/6000	25	5,5	^	100-180
HVH 125	32-125	6000/9000	35	5,5	4	128-200
HVH 250	50-250	6000/9000	35	7,5	5,5	165-250
HVH 315	90-315	6000/9000	45	7,5	7,5	190-290
HVH 400	90-400	6000/9000	45	7,5	7,5	190-300
HVH 75	16-50	4000/6000	25	5,5	3	100-180
HVH 125	32-125	6000/9000	35	5,5	4	128-200
HVH 250	50-250	6000/9000	35	7,5	5,5	165-250
HVH 315	90-315	6000/9000	45	7,5	7,5	190-290
HVH 400	90-400	6000/9000	45	7,5	7,5	190-300
